Conversation: Sneak peek at Tucson 2010!!!

**On the 12th Day of Christmas,
BlueCap gave to me....FREE DVDs!!**

Ho, Ho, Ho....Happy Holidays!!!!

To **celebrate** the holidays, [BlueCap Productions](http://www.bluecapproductions.com) is hosting the **12 Days of BlueCap** where we will be giving away **free copies** of **all** our DVD titles - one title at a time

Will Larson gives us a sneak peek of his Saturday Collector's Day exhibit at the Westward Look Mineral Show.

Every year the [Westward Look Mineral Show](http://www.westwardlook.com) (aka **Fine Mineral Show: Tucson**) puts on the **Saturday Collector Day** where they invite a special collector to display his or her specimens in the lobby of the **Westward Look Resort**.

This has always been a **highly anticipated** and attended affair and it looks like **2010 will continue that tradition** when mineral collector **Will Larson** shares his collection of **Japanese and Worldwide Minerals**.

One piece from his **worldwide collection** that will be on

one title at a time.

The way this works is that for each of the **12 Days**, we will post a **BlueCap-related question** on our [FaceBook group page](#). The **first person** to correctly answer the question will win a **FREE DVD**.

Each question must be **correctly answered** before we move on to the **next day** and you must be a **group member** to win (joining is **free**).

As we want as **many people** as possible to have a **chance to win**, our group must grow by **AT LEAST ten members** for every **giveaway** - so **tell your friends** and get them to **join our group**.

Each question will be posted at **10AM Pacific Time** on the **days of the giveaways** so set your alarms and get those **typing fingers** ready.

Right now we have **54 group members**. As soon as this number hits

display is this outstanding **Tourmaline with Cleavandite** specimen shown above. This **killer specimen** is from the world-famous **Himalaya Mine** in Mesa Grande, CA.

Apart from its **obvious perfection**, one of the things that makes this specimen so **special** is that it was **self-collected** by Will way back in **1989**.

As Will describes it, he was only **4 years old** at the time and his father, [Pala](#)

[International's](#) **Bill Larson**, basically picked him up and shoved him into the pocket - **it was that big**.

After spitting out a **mouth full** of dirt that Will had managed to kick into his face, Bill patiently talked Will through the **careful extraction process** and, little by little, this piece started coming loose.

Covered in **clay**, both the specimen and Will, they took this piece home and **carefully washed it**. As more and more of the **fine details** of this specimen revealed itself, Will knew that he had a very special and **rare piece**. We couldn't agree more!!!

Still **passionate** about the famous **pegmatite mines** that he grew up with, Will continues his **field-collecting** explorations underground at places like **Jeff Swanger's** [OceanView Mine](#) (one of the filming locations for [New Crystal Hunters](#)).

So whether he's out **field collecting** or cruising through obscure **mineral museums** or even working deals with today's **top dealers**, Will Larson is one of those young, active, up-and-coming **mineral collectors** who follows his **dreams** with a **passion** he's had since **before he could walk**.

But don't take our word for it. Come by the **lobby** of the **Westward Look Resort** between the hours of **10AM and 4PM** on Saturday, **February 6, 2010** to check out his

as the number hits
60 we'll start with
the **first FREE**
giveaway!!

If you're not already
a **BlueCap Group**
Member, click on
